DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shiman (U.S. 2002/019827) in view of Prompt (U.S. 6,985,905), in further view of Voticky (U.S. 6,351,764).

As per claim 13, Shiman teaches an email client apparatus for transmitting and receiving email messages comprising: a sorting unit which sorts email messages into a hierarchical structure according to sender addresses (paragraphs 0156-0158); and a list displaying unit which displays a list comprising the sender addresses arranged in tree form, together with titles of the email messages corresponding to the sender addresses (0156-0158). Shiman does not specifically teach that the sender addresses comprise a plurality of labels. Prompt teaches an email sorting system, in which the emails are sorted by sender, and labels are assigned to them, according to their level in the hierarchy (abstract, figure 35). It would have been obvious to one of ordinary skill in the art at the time of the invention to include labels on the sorted emails. The motivation for doing so lies in the fact that assigning labels would allow for easier visual discrimination of different messages. Both inventions lie in the same field of endeavor, namely

the sorting of electronic messages. Shiman-Prompt does not specifically teach that the labels represent domain names. Voticky teaches the arrangement of email messages by domain name. It would have been obvious to combine Voticky's arrangement by domain name, into Shiman-Prompt's system of placing emails into a hierarchy, in which different hierarchical levels correspond to different labels, to arrive at the claimed system of arranging emails by domain name, and having labels correspond to them. The motivation for doing so lies in the fact that adding the concept of sorting by domain name enables further functionality of an email system in which sorting by sender takes place, so that searching and viewing is further facilitated. All inventions are from the same field of endeavor, namely the sorting of electronic mail.

As per claim 14, Shiman-Prompt-Voticky further teaches that said list displaying unit places the label representing the top-level domain as a root node of the tree form and then attaches thereto the other labels representing successively lower levels as branch nodes (Prompt: figure 35).

Claims 15 and 16 are rejected under Shiman-Prompt-Voticky on the same bases as claims 13 and 14, as the instant claims recite limitations similar to those of the earlier claims.

Response to Arguments

Applicant's arguments filed on April 3, 2006 have fully been considered, and are respectfully traversed by the new grounds of rejection as set forth above.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
